

APHA YEARLING COLT: MAGNUMSA BREEZE BAR

Stud Colt: Magnumsa Breeze Bar

DOB: 05-06-2010

Colour: Black & White Tobiano

Homozygous for the Tobiano Factor, could be Double Homozygous for Black!

This Colt, known as "Magnum" is well bred and has many great horses right on his papers! He is halter trained, leads, good for trims and vaccinating, de-worming. Expect this colt to be a great "all around Prospect", with patience and time. He suffered a small injury to his tendon, as a weanling, which has left him with a slightly turned in back leg, however this doesn't affect how he moves out, and he is not lame in any way. He has a willing and curious nature, and learns quickly! He would also make an awesome Stallion potential for someone looking to ad bloodlines, conformation, and size and guaranteed colour, into their stock!

BLOODLINES/PEDIGREE CAN BE FOUND ON ALL BREED PEDIGREE:
